Report from ATLAS Database Workshop

Item Identifier (15 digit) agreed in format compatible with LHC & CMS :

```
1     : 2    20 =ATLAS
2     : 0
3     :  LARG Indentifier
4     :  HEC Indentifier
5     :  567 for Institute Indentifier
6     :
7     :

8     : Reserved for future use

9     : 9-14 Six digits for number of
10    :      item. Item can be person,
11    :      tooling item, or object such
12    :      as EST board.
13    :
14    :
```

Report from ATLAS Database Workshop... Continued

Working Group to be set up for defining "ATLAS data base" and what it should contain... one representative from LARG.

It was accepted, after some discussion, that we were allowed "flat file data bases". So we can stay with what we have!

HEC electronics can save their data on a floppy disk, one for each module.... so long as:

1. There is a backup (a second floppy)
2. It's referred to as a data base
3. We can demonstate we are protected from hackers.
