
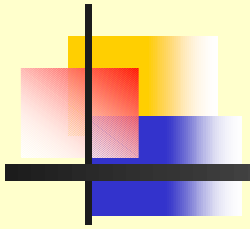
Status of HEC QC

- Summary of QC meeting
  - QC at CERN
  - QC of electronics
  - Status of HEC QC database
- Outcome of QC assessment



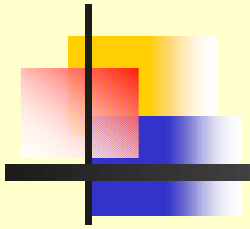
QC at CERN/ QC of electronics

- Discussion of QC at CERN (P. Schacht)
  - QC document will be very soon officially available (last minor changes)
- Status of QC of electronics (H. Brettel)
  - electronics is being QC tested
  - full overview given in next LArg week by Leonid

Status of HEC QC Database

- Overview given by M. Aderholz
- all current data (sent to Michael) available on CD
- info of different labs in corresponding subdirectory
- problems with few tables which are not `very standard' EXCEL data

→ Please make sure YOUR data can be read!



Status of HEC QC DB (2)

- PC with Access installed bought by MPI
  - available at CERN ≈feb. 2001
- work started by J. Zhao for DB of CERN tests

What's in DB now?

- Stacking

Dubna	4 + 2 (restacked from TRIUMF)
MPI	12
Protvino	6
TRIUMF	13 +3 missing

- Copper info from Molnya missing
- looks ≈ up to date

→ but: please, send data latest by arrival of module at CERN !

Outcome of QA Assessment

- Assessment took place in september
- document: ATC-OQ-QR-1001
  - also available from QC web page
- main criticism
  - documents not in EDMS
  - QC should cover electronics as well
  - central DB should be established asap and data uploaded by the time they become available!
